

Thermocouples & Resistance Temperature Detectors (RTDs)

Daily Thermetrics understands that when it comes to replacing thermocouples and RTDs, it is not only the cost of the temperature sensor but also the costs and time involved in replacing the sensor. Every thermocouple and RTD supplied by Daily Thermetrics is designed and manufactured by Daily Thermetrics. Our cutting-edge manufacturing techniques and superior NDT practices ensure maximum sensor service life and performance.

Daily Thermetrics is the exclusive provider of the Daily Premium™ Line,¹ which utilizes the patented and certified SIL 3 capable CatTracker® technology. These thermocouples deliver measurable improvements in reliability and accuracy for temperature critical applications. As an added safety measure for hazardous area locations, Daily Thermetrics also manufactures Flameproof “d” rated assemblies carrying the IEC, ATEX, and TR/CU (GOST-R) certifications.² From simple probes to customized designs, every sensor is backed by our quality guarantee and made to order.

Around-the-Clock Service

Emergency delivery situations commonly arise as a result of discovery during turnarounds. Daily Thermetrics is structured to support your turnaround needs by offering immediate service 24 hours a day, 7 days a week. No matter what time of day or night, a product specialist is always ready to assist you.
